About eScholarship Postprints

The eScholarship Postprints feature provides another way for University of California faculty to disseminate their scholarship, and allows the general public to freely access peer-reviewed articles authored by UC faculty. Read the 2/23/05 Pre-print papers by some of the early adopters of the eScholarship Postprints feature.

Currently, postprints are being added to the eScholarship Repository by select help us test this new service — the full service will be launched February 23, 2005.

The eScholarship Repository is hosted by the California Digital Library, Office of the President. The program was launched to facilitate innovation and experimentation in the production and dissemination of scholarship. The Repository is designed to provide a full range of scholarly output, including pre-publication materials, journals and series, as well as post-publication materials.

Please visit the University of California’s Reshaping Scholarly Communication website interested in learning more about the crisis in scholarly communication and what can be done about it. For a list of publisher policies as they relate to postprints, visit the SHERI, which is dedicated to issues about scholarly communication and open-access.

Depositing Postprints

If you are affiliated with UC and are interested in depositing postprints to the eScholarship Repository, please read more about Submitting Postprints to the Repository.

Requirements

An eScholarship Repository Postprint must be:

- Previously published in a peer-reviewed journal
- Authored or co-authored by at least one person affiliated with UC
- Compliant with the original publisher’s policy on electronic distribution of the author must have express permission from the publisher to use the material
- Able to use the currently available technical infrastructure, which supports associated content (images, spreadsheets, etc.)

Benefits

Postprints in the eScholarship Repository offer UC faculty:

- Full-text versions of articles and supplemental material
- Indexed and searchable papers, searchable both across all repository co-creator and exclusively within postprints

http://repositories.cdlib.org/postprints/about.html 5/13/2005
- Monthly reports to authors of their paper and article download rates
- Infrastructure provided by the University at no charge to your research
- An alternative way to manage their copyright

**Policies**
