The duties of the School of Medicine Committee on Curriculum and Educational Policy are to consider and report on matters referred to it by the university, campus, school and Academic Senate; and to initiate such studies and make such reports appropriate to the MD curricula and educational policy. CCEP provides faculty oversight to the overall curriculum, pedagogy, and assessment of the undergraduate medical education program, and is a standing committee of the School of Medicine Faculty Council. It is accountable for the integrated institutional responsibility in medical education programs for the overall design, management, and evaluation of a coherent and coordinated curriculum.

Sincerely,

Joseph Sullivan, MD, Chair
